**FOR IMMEDIATE RELEASE**

January 15, 2009

To our valued customers,

**It has been brought to ProStar's attention that there is an error in our recently published 2009 NOAA West Coast Tide Tables.**

Beginning with page 307 thru page 355 (Alaskan Hourly Supplement for Anchorage, Nikiski, Seldovia and Valdez, Alaska) the tides are missing all negative tides. This error was caused when we converted the data from the NOAA files.

The regular Monthly Tides for these same areas are correct and all remaining data in the book are accurate.

You have four options:

1. You can advise us as to how many copies of the corrected section you require, and we will ship you the Alaskan Supplement to sell along with the current inventory on hand.
2. You can download the PDF file enclosed and forward it to your customers who have purchased this title from you.
3. Go to [www.prostarpublications.com](http://www.prostarpublications.com) and download the file from here for your own use (as of 1/25/09)
4. Do nothing as this is a non-relevant issue. Your customer is not planning on being in these Alaskan waters.

Please accept our apologies for any problems this may have caused.

Thank you,

Peter L. Griffes  
Publisher
